

College Representative Report

Per the College Representative Code of Procedure Policy 018, each college pair is responsible for submitting one report and updates to the Cabinet Chair 72-hours before the cabinet meeting. Reports should cover college announcements, updates and speak to the following questions.

College: Engineering, Computer Science, & Technology Date: 9/24/18

Representative Name(s): Edgar E. Chavez, Smitkumar Patel

- I. How did you complete your specific duties during this period in relation to the ASI policy? Please provide detail regarding the project(s) are you currently working on?

Completed my office hours and attended the required meetings. Assisted in the office by taking a call and greeting people in the front desk while the receptionist took care of a package. Currently still working on the MashUP but having trouble getting responses from participants and faculty members. I met with one professor whom asked me to email him and have yet to receive a response. Waiting on Marcus for one last change on the date (will be out of town on Nov. 13th) and confirmation of what locations we can use in the library. Smit and I also met with T.Fox whom gave us information about incoming events and briefly talked about the graduation rate and graduation initiative that is being implemented.

- II. What did you learn during this biweekly period? Do you have any comments or concerns that ASI can follow up on?

Learned more about the budget that college reps as a whole have to spend on things such as d-stress event and other possible collaborations we can have. In the meeting with T.Fox we talked about how the ECST college is trying to increase the graduation rate by having freshman students start in Calculus instead of a lower level math class (which in turn extends the graduation date about 1-2 years per student.

I also want to say that if all college reps are going to be planning something together we should think of something else aside from d-stress.

III. What are your goals for the upcoming semester?

Successfully throw the ECST-MashUP event. For next semester have Anita Sengupta come and speak to engineers, in specific female engineers, about her career as a scientist, researcher, professor, and engineer to motivate those present to reach for new levels.

IV. How do you plan on helping resolve issues that constituents have?

Bringing them to table of BOD and talking to key figures and seeing what they might be able to help us in.
