## How prices are calculated

In most cities, your cost is calculated up front, before you confirm your ride. Here are some fees and factors that can affect your price:

### Base rate

The base rate is determined by the time and distance of a trip.

### Booking fee

In your city a flat fee might be added to each trip and helps support operational, regulatory, and safety costs.

### Busy times and areas

When there are more riders than available drivers, prices temporarily increase until supply and demand are rebalanced.
