<b>Undergraduate Applicants</b>	

**Have you earned at least six (6)-semester units of academic credit per semester at Cal State LA during the past 12 months prior to application (not including remedial courses)?** Yes

**Will you be enrolled in at least six (6)-semester units of academic credit during the semester you are applying.** Yes

**Are you aware that you must be enrolled in a minimum of six (6) units per semester while in office?** Yes

**Are you aware that you must maintain a 2.5 GPA each semester while in office?** Yes

**Have you earned less than (150)-semester units?** Yes

**What previous experience have you had in the area in which you are applying for?**

Throughout high school, I was apart of and an officer for the drama club. I served as the club historian, secretary and president my senior year. We had to make decisions about club funding, plan weekly club meetings, organize fundraisers and plan outside club events such as an annual banquet and district wide drama club event. Our club was involved in student outreach through school daily announcements, social media and poster making. I have some experience in the environmental sciences as I took AP Environmental Science my sophomore year of high school.

**State briefly why you are applying and/or are interested in this position**

I am very interested in this position as it is directly related to the career that I would like to go into. My dream job would be working for LA county as a sustainability director to make Los Angeles more sustainable and move away from a dependence on fossil fuels. I also would love to be apart of making Cal State LA more sustainable and the blueprint for a sustainable campus across America.

**What do you feel are some of the major problems facing the students of Cal State LA?**

I feel that Cal State LA could better implement its zero waste goal. I think the initiative is a great idea but there is so much more that we could do to make it a reality. While installing recycle bins all over campus is great, hardly any of the items that end up in the recycle bin the U.S. actually get recycled. There is also all of the non recyclable trash that we end up throwing away anyways. I feel that we could add compost bins around campus especially with the edible garden becoming a reality on campus. Something that I would love to see on Cal State LA would be a gasification system. Gasification turns trash into a gaseous state which can be used to make other things such as electricity, bio-fuel, fertilizer and other useful chemicals. If Cal State LA were to do this, our college would be a pioneer in sustainability and be able to self sustain in so many ways with out relying on fossil fuels as well as actually being zero waste. The university could use the campuses trash to power the school's electricity needs, the bio-fuel could be used at a pump at the hydrogen station on campus, we could use the fertilizer for the edible garden and plant more trees on campus, and other useful chemicals could be self sustaining in laboratory classes. There is even more to discover about this green technology and so much research can be done on it to discover its possibilities. I'm sure it's a long shot and expensive but this could change the university and spark a green revolution on campuses across the country.

**List activities and/or organizations that you have been involved with (on or off campus)**

I am apart of the edible garden club on campus. Throughout high school, I was involved in drama club. I work in the University Student Union on campus (however, I am not working at the moment due to COVID-19.)
