# Clamp-On and Bolt-Together Framing & Fittings

## Steel Bolt-Together Framing and Fittings

Rails are drilled with consistently spaced holes for multiple mounting options that do not require machining. Use this bolt-together framing to build guards, tables, and racks.

### Rails

Rails have bolt holes on all four sides. Connect multiple rails with brackets or slide one length of rail into the next larger size and bolt together using curved-bolt or locking-pin connectors. Select connectors based on the larger size rail in the connection.

**Galvanized steel** rails have good corrosion resistance in wet environments.

**Steel** rails are lightly oiled.
